Welcome to EUMeTrain

International training project sponsored by EUMETSAT with the objective to facilitate and increase the effective use of satellite data by offering training

Exclusive Online Training Course & Workshop: Principles in Satellite Meteorology

Registration Deadline: February 28, 2011 11:59 PM

Dear Sir or Madam,

We would like to invite you to our new satellite meteorology course!

Based on the new defined **WMO satellite meteorology criteria**, Eumetcal & EUMeTrain provide a comprehensive satellite course this year. This course consists of 3 separate blocks which address applications as well as **Physical background information on satellite technology**.

The first block "Principles of Satellite Meteorology" start in April 2011. In a series of 12 online lectures **experts** from **EUMETSAT** and **EUMeTrain** will teach **efficient work with satellite data**.

In addition there will be a classroom **workshop** in Darmstadt at the end of May (23.05 – 27.05.2011) where open source software for the visualization of satellite data will be explained.

The online course starts on **1. April, 9 UTC**. The following sessions will be held on regular basis: Tuesday morning (9 UTC) and Thursday afternoon (13 UTC). A detailed schedule will be issued on the EUMeTrain homepage: www.eumetrain.org; The course fee is 500 Euro. Register online (→ [go to online form](#)) or contact the course manager: karin.schmeisser@zamg.ac.at

Best Regards

Karin Schmeisser
Course Manager

PS: **"Continuous training is the best chance to improve your skills".**
